

## **Mechanical Intern, Machine Maintenance Position**

Bel Air Finishing is seeking a temporary, part-time person for our Machine Design & Building Department and Surface Finishing Lab to assist in the update and design of our equipment and the process development of custom surfaces.

Duties would include, but not be limited to;

- Operation of basic machine shop equipment (i.e. lathes, millers, etc )
- Operation of surface finishing equipment
- Some light general cleaning and maintenance is part of position.

SolidWorks proficiency is helpful but not necessary

A background in the following, while not required, would be beneficial.

- Robotic operations
- Pneumatic and hydraulic experience
- Electrical machine control experience
- Word and Excel

Paid position depending on degree of experience. Flexible hours (10-20hrs/week).

Normal length of employment is 3-6 months but can be extended
